

Want to foster
innovation

in schools

in less than
two seconds?

A review of innovation-promoting resources (offered by CPCO) share one **CONSISTENT** theme.

- Tips to Build a Culture of Innovation - Jamie Richardson
- Innovation to Best Practice and Questions to Lay the Foundation for Innovation -George Couros
- How to build a true culture of Innovation at Your School This Year - AJ Juliani -Four Ways to School Leaders Can Support Meaningful Innovation - Justin Reich -Leadership and the Fear of Innovation – A Call to School Principals and System Leaders
- Debbie Donsky -Considerations of Leading a MakerSpace Movement in your School (video)- Jeanne Hughes -A local innovation project: St. Jerome's SPLICE week - Jennifer Casa-Todd

Start saying

YES

There are already
people in schools
brimming with
innovative
ideas—but they
have been shut
down over and
over.

People learn to be silent
quickly

People also learn when
the call for innovation
is all talk and no action

Start saying 'yes' to
as much as you can,
and see where it
takes your school!

Let's practice!

“Can we work in partners?”YES.

“Can we read outside?” ...YES.

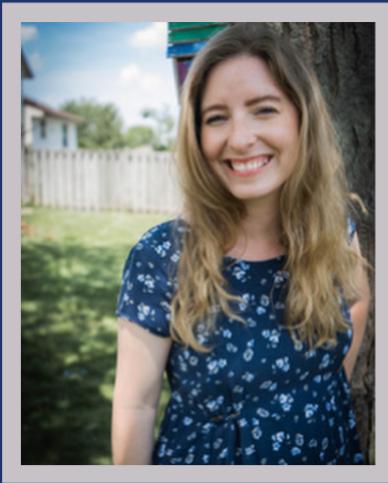

“Can we collect all the pizza boxes
after lunch?” YES.

“Can we take our pencil cases
outside at recess?” YES.

**It might be hard at first,
and you might have to be
creative in how you say
yes to things, but the
more you say yes, the
more you are helping to
build a culture that
supports innovation!**
